From ANSI Z87.1 impact resistant shooting glasses to premium electronic hearing protection to high visibility apparel, Radians safety gear is up for the challenge and meets the required safety regulations and standards.

Radians offers both performance and premium shooting glasses to meet the needs of first-time shooters or professional marksmen who demand the very best. We also carry a wide range of passive and electronic earmuffs and disposable and reusable earplugs.

BECAUSE COMFORT, FIT, AND STYLE MATTER

If it's not comfortable, safety gear may get left behind in the duffle bag. That's why Radians pays special attention to comfort features, such as wire core adjustable temples, vented rubberized nosepieces, padded adjustable headbands on earmuffs, and gun stock cutouts.

RADIAN'S[®] CAPABILITIES & PROGRAMS GIVE OUR DISTRIBUTORS & RETAILERS THE COMPETITIVE ADVANTAGE

- Fast & economical custom imprinting for personalized branding
- Radians automated warehouse solution increases levels of customer service & satisfaction:
 - Real-time shipping information
 - Expediting same day orders more efficiently
- Crossfire retail displays for high-class merchandising of premium safety eyewear

TESTING & STANDARDS

RADIANS® PERFORMANCE PROTECTIVE EYEWEAR

Because of our global presence and our culture of safety, Radians tests products to meet or exceed standards, including ANSI Z87.1, MIL-PRF-32432 Ballistic Fragmentation, CSA Z94.3, EN166, and AS/NZS 1337. Consumers can feel confident about Radians products meeting all necessary safety standards and regulations.

All Radians® and Crossfire® eyewear complies with ANSI Z87.1 impact standards, protects against 99.9% of harmful UV rays and includes a hard coat polycarbonate lens to protect against scratches.

STANDARD	IMPACT	CALIBER	PROJECTILE
ANSI Z87 + High Velocity	1500 feet / second 45 meters / second	0.25 inch diameter steel ball (25 caliber)	
MIL-PRF-32432 Ballistic Fragmentation	640-660 feet / second 195 meters / second	0.15 inch diameter steel projectile (15 caliber)	
High Mass Impact	17.6 oz / 50 in height 500 g / 127cm height	17.6 oz / 500 g pointed projectile dropped	

KNOW THE DIFFERENCE

Eyeglasses are **NOT** safety glasses unless both the lenses and frame are in compliance with the specifications for safety eyewear described in the ANSI Z87.1 Standard.

POLARIZED LENSES

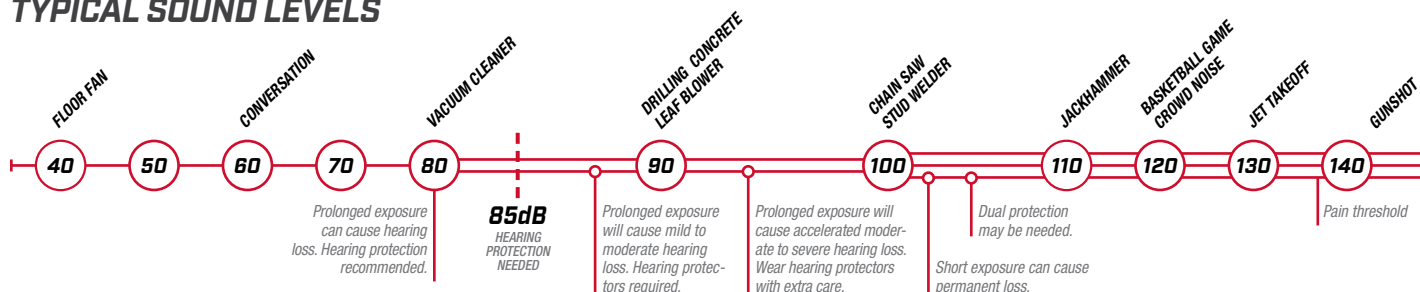

Radians' polarized lenses prevent glare by filtering out the reflective bent light and glare, resulting in enhanced vision.

HEARING TESTING & STANDARDS

Radians® earned NVLAP Accreditation to test and certify hearing protective devices (NVLAP Lab # 500090-0). Accreditation, which is issued by the National Institute of Standards and Testing (NIST), allows Radians to perform accredited acoustical testing of hearing protection devices to the ANSI/ASA S3.19 and S12.6 standards. Radians' accredited lab is now a member of a very select group and viewed as a leader in the hearing protection industry.

TYPICAL SOUND LEVELS

dB (DECIBEL)

The unit used to express the intensity of sound. The decibel scale is a logarithmic scale in which 0 dB approximates the threshold of hearing in the mid frequencies for young adults. The threshold of discomfort is between 85 and 95 dB SPL, and the threshold for pain is between 120 and 140 dB SPL.

MADE IN THE USA

American consumers are becoming increasingly aware of the Made in USA labels and the impact they can have on our economy by purchasing American made products. Radians® is increasing the selection of Made in USA products every year. This initiative increases employment in the US, improves speed of replenishment and provides users with the option to 'Buy American,' when choosing personal protection products. The Made in USA range includes foam ear plugs, high visibility and reflective apparel, protective eyewear and lens cleaning accessories.

QUALITY ASSURANCE

The International Organization for Standardization (ISO) 9001:2015 specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements. Our ISO 9001:2015 certification reinforces the Radians® commitment to quality assurance and to consistently manufacture and distribute quality personal safety products.

CROSSFIRE® MEETS THE DEMAND FOR STYLE & TECHNOLOGY.

All eyewear features scratch resistant hard coat polycarbonate lenses, 99% UVA/UVB protection from harmful sun exposure and exceeds the industry standards for impact and shatter resistance set forth by ANSI.

Crossfire products are tested to the same ANSI Z87.1+ standards for impact and shatter resistance as other Radians® safety glasses but in designs that reflect the most current styles, materials & colors.

Many Crossfire styles are available in amber, clear & smoke lenses, making them perfect for shooting at the range, hunting wild game, working in the workshop or riding ATVs. Regardless the adventure, Crossfire provides superior comfort, fit and protection.

ENHANCED OPTICAL CLARITY

The optically correct portion of the lens blank is pinpointed and marked at the focal point.

DE-CENTERED CUT LENS

The de-centered lens is cut to match the focal point with actual line of sight, ensuring optical clarity.

HD LENS TECHNOLOGY

Crossfire's High Definition (HD) Lens Technology provides enhanced vision by filtering the most damaging blue rays and allowing for less glare and better visual acuity.

Combined Attenuation: 38dB
When Dual Protection is Used

PART#	DESCRIPTION
MXD100CS	Maximus™ Passive Earmuff w/ Foam Earplugs

* Clamshell Packaging

DUAL USE ATTENUATION: Due to the extreme noise levels produced by firearms, dual protection is recommended for maximum protection. Per the OSHA Technical Manual, attenuation provided by wearing dual protection such as earmuffs with earplugs can be estimated by adding 5dB to the higher of the two product NRR values. For example, with an earplug of 33 dB NRR and an earmuff of 28 dB NRR, combined attenuation can be estimated as 33 dB + 5 dB = 38 dB. Actual attenuation will vary by user.

WOMEN'S SAFETY GEAR

Women are the fastest growing segment of gun owners in the United States. While they enjoy both sport and leisure shooting, many are simply looking at gun ownership as a means of extra security and protection. Women's increased enrollment in gun-safety courses and range memberships combined with the mercurial growth of gun permits for women has accelerated the need for stylish women's PPE that fits properly while providing maximum comfort and protection.

LOWSET™

- Low profile earmuff
- Compact folding feature
- Adjustable moisture wicking headband

This low profile earmuff works well for men but features adjustability making the fit suitable for women and youth.

Shyanne ROBERTS

Radians has been a fan and sponsor of champion youth shooter Shyanne Roberts for almost a decade now. We've watched her on ABC Nightline news advocating for our Second Amendment rights. We've seen her on the covers of Junior Shooters and Shooting Journal. And we have shared in her joy when she won first place in numerous shooting competitions across the United States. She has grown up in front of our eyes. And now a new chapter waits for her as she will graduate from high school in May 2022.

What's she setting her sights on for the future?

Her plans are to attend York Tech for her first two years. Then she hopes to go to Clemson or Liberty University. She's not sure what she will major in yet, but she also has interests in protecting people as a K-9 officer or using her hands in high-skilled Stick and Tig welding. "No matter what I do, shooting will always be an important part of my life, and I am glad that Radians has been with me in the first part of my journey."

"No matter what I do, shooting will always be an important part of my life"

Congratulations, Shyanne!

COOLING GEAR

If your work or hobbies involve the outdoors and unpleasant or even dangerously warm conditions, consider the comfort and protection of Arctic Radwear cooling products from Radians. Arctic Radwear products accelerate the evaporative cooling process and provide welcome, and in some cases, essential relief from the heat. Safe and reusable, just soak the product in water then wear for several hours of cooling relief.

COOLING VEST

- Uses a unique 3-layer fabric system which absorbs, stores and releases water to keep your body temperature cool and safe
- Contains a waterproof & breathable inside membrane to minimize moisture transfer
- Adjustable stretch spandex waist
